

Patient Name:

Sample Patient Evaluation

Age / Gender:

35 Yrs / Adult

Referred By:

Health Assessment Panel

Report Date:

07-Aug-2026

Specimen Status:

Standard Protocol

Panel Type:

BP, RPG, OGTT Graph & Symptoms

1. BLOOD PRESSURE (BP) DIAGNOSTIC ASSESSMENT

| PARAMETER                | OBSERVED RESULT | REFERENCE RANGE | STATUS | UNIT |
|--------------------------|-----------------|-----------------|--------|------|
| Systolic Blood Pressure  | 118             | < 120           | NORMAL | mmHg |
| Diastolic Blood Pressure | 78              | < 80            | NORMAL | mmHg |

2. PLASMA GLUCOSE & OGTT DIAGNOSTIC CURVE

| TEST DESCRIPTION            | OBSERVED RESULT | REFERENCE RANGE | CLINICAL CATEGORY |
|-----------------------------|-----------------|-----------------|-------------------|
| Random Plasma Glucose (RPG) | 105 mg/dL       | 70 – 140 mg/dL  | NORMAL            |
| OGTT — Fasting Baseline     | 92 mg/dL        | 70 – 99 mg/dL   | NORMAL FASTING    |
| OGTT — 2-Hour Post Glucose  | 132 mg/dL       | < 140 mg/dL     | NORMAL TOLERANCE  |

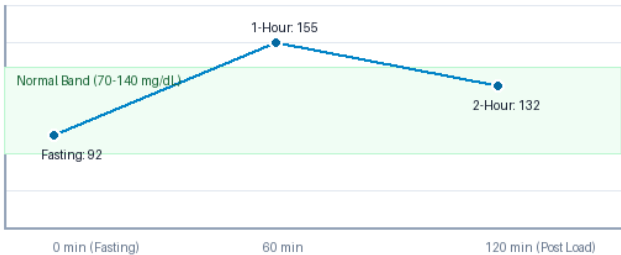

Figure 1.0: Oral Glucose Tolerance Test Response Curve (mg/dL vs Time in Minutes)

3. DIABETES CLINICAL SYMPTOMS CHECKLIST

| SYMPTOM PARAMETER       | CLINICAL DESCRIPTION                                        | SCREENING STATUS  |
|-------------------------|-------------------------------------------------------------|-------------------|
| Polydipsia              | Excessive, unquenchable thirst despite regular fluid intake | ABSENT / NEGATIVE |
| Polyuria                | Frequent, abnormally high-volume urination                  | ABSENT / NEGATIVE |
| Polyphagia              | Persistent extreme hunger even after regular meals          | ABSENT / NEGATIVE |
| Unexplained Weight Loss | Unintended weight reduction without dietary changes         | ABSENT / NEGATIVE |
| Chronic Fatigue         | Persistent lethargy and low energy levels                   | ABSENT / NEGATIVE |
| Blurred Vision          | Visual changes associated with fluid osmotic shifts         | ABSENT / NEGATIVE |
| Slow Wound Recovery     | Delayed healing response in minor cuts or abrasions         | ABSENT / NEGATIVE |
