

Patient Name:

Sample Patient Evaluation

Age / Gender:

35 Yrs / Adult

Referred By:

Clinical Health Assessment

Report Date:

07-Aug-2026

Specimen Status:

Standard Protocol

Panel Type:

BP, RPG, OGTT & Symptoms

1. BLOOD PRESSURE (BP) DIAGNOSTIC ASSESSMENT

PARAMETER	OBSERVED RESULT	STANDARD REFERENCE RANGE	STATUS	UNIT
Systolic Blood Pressure	118	< 120	NORMAL	mmHg
Diastolic Blood Pressure	78	< 80	NORMAL	mmHg

- Cardiovascular Reference Standards (AHA Guidelines)
- **Normal:** Systolic < 120 AND Diastolic < 80 mmHg
 - **Elevated:** Systolic 120–129 AND Diastolic < 80 mmHg
 - **Stage 1 Hypertension:** Systolic 130–139 OR Diastolic 80–89 mmHg
 - **Stage 2 Hypertension:** Systolic ≥ 140 OR Diastolic ≥ 90 mmHg

2. PLASMA GLUCOSE & METABOLIC TESTING

TEST DESCRIPTION	OBSERVED RESULT	REFERENCE STANDARD RANGE	CLINICAL CATEGORY
Random Plasma Glucose (RPG) Arbitrary timing without prior fasting	105 mg/dL	70 – 140 mg/dL	NORMAL
OGTT — Fasting Baseline Fasting requirement: 8–10 hours	92 mg/dL	70 – 99 mg/dL	NORMAL FASTING
OGTT — 2-Hour Post Glucose Measured 2 hrs after 75g standard glucose load	132 mg/dL	< 140 mg/dL	NORMAL TOLERANCE

- Oral Glucose Tolerance Test (OGTT) Diagnostic Criteria
- **Normal Glucose Tolerance:** 2-Hour OGTT < 140 mg/dL
 - **Impaired Glucose Tolerance (Prediabetes):** 2-Hour OGTT between 140 and 199 mg/dL
 - **Diabetes Mellitus Threshold:** 2-Hour OGTT ≥ 200 mg/dL (or RPG ≥ 200 mg/dL with classic symptoms)

3. DIABETES CLINICAL SYMPTOMS CHECKLIST

SYMPTOM PARAMETER	CLINICAL DESCRIPTION / DEFINITION	SCREENING EVALUATION
Polydipsia	Excessive, unquenchable thirst despite adequate fluid intake	ABSENT / NEGATIVE
Polyuria		ABSENT / NEGATIVE

SYMPTOM PARAMETER	CLINICAL DESCRIPTION / DEFINITION	SCREENING EVALUATION
	Frequent, abnormally high-volume urination (including nocturia)	
Polyphagia	Persistent extreme hunger even after regular meals	ABSENT / NEGATIVE
Unexplained Weight Loss	Unintended weight reduction without dietary changes	ABSENT / NEGATIVE
Chronic Fatigue	Persistent lethargy and low energy levels	ABSENT / NEGATIVE
Blurred Vision	Visual changes associated with fluid osmotic shifts	ABSENT / NEGATIVE
Slow Healing / Cut Recovery	Delayed healing response in minor wounds or skin abrasions	ABSENT / NEGATIVE

IMPORTANT MEDICAL & DIAGNOSTIC NOTICE

This document represents a standardized laboratory diagnostic template and educational sample report covering Blood Pressure assessment, Random Plasma Glucose, OGTT, and clinical diabetes symptom parameters. It is intended for informational and educational layout evaluation only and does not constitute an official medical certification or direct medical diagnosis. Clinical decision-making must always be performed by a qualified healthcare professional based on formal laboratory testing and clinical evaluation.
