Courses

Python AI ML, Sortiq Solution Pvt Ltd. 01/2026 – 07/2026
Mohali

Academic Projects

Quickkart Delivery System, Full-Stack E-Commerce Web Application for Online Grocery Ordering & Delivery Tracking

- Developed a full-stack grocery delivery web application with secure authentication, online payments, cart system, and real-time order management using Python Flask.
- Built an advanced e-commerce grocery platform with admin dashboard, delivery tracking, and automated notification system.
- Designed and deployed a responsive grocery ordering system with integrated payment gateway and inventory management features.

FashionHub – E-Commerce Website, Modern Online Shopping Platform using HTML, CSS & JavaScript

- Developed a responsive fashion e-commerce website using HTML, CSS, and JavaScript with interactive UI, product showcase sections, and mobile-friendly design.
- Built a modern online shopping platform with responsive layouts, smooth scrolling, and attractive frontend user experience.

Travel and Stay, A Full-Stack Flask-Based Web Application for Destination Discovery, Hotel Booking, Taxi Reservation, and Travel Management

- Developed a travel booking platform using Python Flask and SQLite Database.
- Implemented user authentication and session management.
- Designed modules for destination management, hotel booking, taxi reservation, and booking history.
- Added dynamic pricing, room availability tracking, and admin controls.
- Created a responsive frontend using HTML, CSS, JavaScript, and Jinja Templates.
- Integrated secure password hashing using Werkzeug Security.

Certificates

- AWS Academy graduate – AWS ACADEMY CLOUD OPERATIONS
- Cyber security – ETHICAL HACKING
